

Pharma, MedTech and Digital Health Innovation Pipeline | June 2022

THERAPEUTIC PROGRAMS

Disease area/program name	Indication/product	Modality	Mechanism of Action	Discovery	Hit to lead	Lead Optimisation	Pre-clinical	Clinical	Sales
Oncology									
Gardasil®	Cervical cancer	Vaccine	HPV VLPs	●	●	●	●	●	●
Combination therapy for enhanced ADCC	Cancers treated with targeted antibody therapies	Small molecule	Endocytosis inhibition	●	●	●	●	●	
Anti-CDCP1 antibody	Ovarian, pancreatic and colon cancer	Antibody	Antibody-drug conjugate or radio-therapeutic	●	●	●	●		
QEDDI Immuno-dermatology	Squamous cell carcinomas in organ transplant recipients (OTRs)	Small molecule	Skin-based immune cell rescue for OTRs on immune-suppression	●	●	●	●		
QEDDI Q02	Prostate cancer	Small molecule	First-in-class, ion channel inhibitor	●	●	●	●		
C5a receptor agonist	Cancers and complement immune system disorders	Peptide	C5a receptor agonist	●	●				
PEG cell engager	Head, neck and breast cancer	Antibody	Multi-epitope targeting bispecific antibody cell engagers	●	●				
Pain									
ORL-1 modulator	Nociceptive	Peptide	ORL-1 agonist	●	●	●			
Alpha conotoxin	Neuropathic	Peptide	First-in-class dual GABA _b agonist and α9α10 nAChR antagonist	●	●				
Nav1.7 (resting-state specific) inhibitor	Acute and chronic pain	Peptide	Inhibitor of resting-state (not slow-inactivated state) of Nav1.7	●	●				
Inflammation and Autoimmune									
Roche	Inflammation	Small molecule	Inflammasome NLRP3 inhibitor	●	●	●	●	●	
Tolerising T1D specific liposome immunotherapy	Type 1 diabetes	Lipid nanoparticle	Antigen specific immune tolerance induction	●	●	●	●		
Tolerising RA specific liposome immunotherapy	Rheumatoid arthritis	Lipid nanoparticle	Antigen specific immune tolerance induction	●	●	●			
PGD2	Asthma, atopic dermatitis and Duchenne muscular dystrophy	Small molecule	PGD2 synthase inhibitor	●	●	●			
PAR2 modulator	Inflammation (IBD, psoriasis)	Small molecule	PAR2 antagonist	●	●	●			
C3a modulator	Inflammation (arthritis, asthma and IBD)	Small molecule	C3a receptor antagonist	●	●				
HDAC inhibitor	IBD and arthritis	Small molecule	Isoform selective HDAC inhibitor	●	●				
Novel NF-κβ inhibitor	IBD	Small molecule	Novel NF-κβ inhibitor derived from gut microbial metabolites	●	●				
ACE-2 stimulation	Diabetes mellitus and chronic kidney disease +/- diabetes	Peptide	ACE-2 stimulation	●	●				
Factor XIIa	Coagulation, inflammation	Peptide	Factor XIIa specific (serine protease) inhibitor	●					
Dendritic cell targeted immunotherapy	Autoimmune diseases	Lipid nanoparticle	Dendritic cell targeted immunotherapy	●					
Tolerising disease specific immunotherapy	Autoimmune diseases	Lipid nanoparticle	Antigen specific immune tolerance induction	●					
NASH, Diabetes and Obesity									
FGF1 obesity	Obesity	Biologic	Antisense inhibition of FGFR	●	●	●	●		
Targeted IL-22	NASH and type 2 diabetes	Biologic	Inhibit oxidative and ER stress, hepatic inflammation and fat accumulation	●					
PAR2 modulator	Obesity and type 2 diabetes	Small molecule	PAR2 antagonist	●	●	●			
CNS									
NuNerve	Amyotrophic lateral sclerosis and spinal cord injury	Biologic	Epha4 antagonist	●	●	●	●	●	
ASIC1a	Stroke neuroprotection and cardiac myoprotection	Peptide	Selective ASIC1a inhibitor	●	●	●	●		
QEDDI Q07	Parkinsons, Alzheimers and other neuro-inflammatory diseases	Small molecule	Inhibitor of undisclosed kinase target, first-in-class opportunity	●	●	●	●		
C5a receptor antagonist	Neuroinflammation	Peptide	C5a receptor antagonist	●	●	●			
Nav1.1	Epilepsy	Peptide	Nav1.1 agonist	●	●				
Anti-Tau antibodies	Neurodegeneration	Antibody	Anti-Tau antibodies	●					
Infectious Diseases									
Molecular clamp sub-unit vaccine	COVID-19, universal flu, RSV, Ebola and others	Vaccine	Hyper-stabilised viral pre-fusion protein vaccine platform	●	●	●	●	●	
Ebola antibody therapeutic	Post exposure prophylaxis for Ebola virus	Antibody	Glycoprotein-specific equine IgG	●	●	●	●		
Vancapticin	MDR Gram positive bacteria	Peptide	Membrane disruption	●	●	●			
Novel octapeptin and polymyxin analogues	MDR Gram negative bacteria	Peptide	Membrane disruption	●	●	●			
Novel chimeric flavivirus vaccine platform	Dengue, Zika, Yellow Fever, West Nile and other flaviviruses	Vaccine	Chimeric flavivirus antigen with insect-specific flavivirus	●	●				
Novel coronavirus vaccine platform	COVID-19, SARS, MERS and other coronaviruses	Vaccine	Coronavirus antigen and insect virus virions	●					
Self-adjuvanting vaccine platform	HPV, Group A Streptococcus and other infectious agents	Vaccine	Self-assembling adjuvant for peptide and protein-based vaccines	●					

Pharma, MedTech and Digital Health Innovation Pipeline | June 2022

Program Name		Indication/product	Modality	Mechanism of Action	Discovery	Pre-clinical	Clinical	Sales
REGEN MED	Regenerative Medicine, Cell and Gene Therapies							
	TheraPhil	Neutropenia	Cell therapy	Neutrophils	●	●		
	Kidney tissue from iPSCs	Kidney cells and organoids	Cell therapy	Stem cells	●	●		
	Bioactive polymer scaffold for dental applications	Bone regeneration with dental focus	Material	Method of incorporating nano bioactives	●	●		
	Primed endothelial progenitor cell based treatment	Hypoxic-ischemic encephalopathy (HIE) and vascular conditions	Cell therapy	Stem cells	●	●		
	HA-PPS MSC differentiation to cartilage	Knee meniscus and spinal disc repair	Hydrogel/scaffold	Differentiation factor	●			
	Porous tissue scaffold	Tissue scaffold	Material	Method to control porosity	●			
	Scaffold that mimics cell surface	Tissue scaffold and implant coating	Material	Controlled spacing of polymer surface features	●			
	CAST gene editing platform	Next generation gene editing platform	Gene therapy	Gene editing	●			
Scaffolds for periodontal ligament alignment	Tissue repair in periodontitis	Material	Guided ligament growth	●				
TOOLS	Research and Development Tools							
	Automated Topology Builder (ATB)	Software to improve molecular modeling and molecular dynamic calculations of small molecules			●	●	●	●
	Growth hormone assay	<i>In vitro</i> bioassay for growth hormone and analogues			●	●	●	
	Release media	Enables culturing of difficult stem cells			●			
	Yeast booster	Engineered stable yeast for boosted production of desired protein, peptide or small molecule without specialised culture conditions			●			
	Barcoding for single-cell sequencing	Knock-in genetic barcode technology for multiplex single-cell sequencing			●			
	MEDTECH & DIGITAL HEALTH	Biomedical Devices and Diagnostic Technologies						
ImpediMed		Lymphoedema bioimpedance			●	●	●	●
ResApp Health		Mobile health for respiratory disease diagnosis			●	●	●	●
Q-Sera		Universal blood collection pathology tubes that rapidly produce high quality serum			●	●	●	
INOVIQ		Exosome-based ovarian cancer test			●	●		
Methylscape pan cancer diagnostic		Rapid method for identifying and isolating cancer genomic and cell free DNA			●			
Scanning ultrasound technology		Scanning ultrasound for treating Alzheimer's Disease			●	●		
Diagnostic for treatment-resistant depression		Companion diagnostic for personalised screening and development of ketamine and related MOA drugs			●			
Novel chimeric flavivirus virions for diagnostics		Dengue, Zika, Yellow Fever, West Nile and other flaviviruses			●			
Novel chimeric virions for diagnostics		COVID-19, SARS, MERS and other coronaviruses			●			
Vaccine and Drug Delivery Platforms								
Vaxxas		Needle-free vaccine delivery using high-density micro-array patch (HD-MAP)			●	●	●	
ProGel		Oral and gut stable encapsulation of API for release in small intestine			●	●		
Sol-gel delivery for drugs to nasal membranes		Liquid formulation which gels upon contact with membranes to extend drug absorption			●	●		
Silica nanoparticle delivery platform		Methods to prepare novel silica nanoparticle, load with specific actives and targeted delivery			●	●		
Sol-gel delivery for drugs to non-nasal membranes		Liquid formulation which gels upon contact with membranes to extend drug absorption			●			
Peptide oral bioavailability platform		Modification to peptide drugs to increase oral bioavailability			●			
Nanocapsules		Encapsulated emulsion droplets for sustained or burst release and ability to coat microbes			●			
Bi-specific PEG		Multi-specific targeting constructs for immunotherapy (cell engagers or antibody drug conjugates) and imaging (radio-labeled antibody)			●			
Self-adjuvanting platform for peptide vaccines		Self-assembling adjuvant for peptide vaccines demonstrated with HPV and Group A Streptococcus			●			
Digital and Allied Health								
Comprehensive Health Assessment Program (CHAP)	Evidence-based program to improve the health of adults with intellectual disability			●	●	●	●	
BRAVE	An interactive, digital cognitive behaviour therapy (CBT) program, developed specifically for anxious children and teens (and their parents)			●	●	●	●	
Geriatric Anxiety Inventory (GAI)	Evidence-based tool for older people to measure anxiety and distinguish from dementia			●	●	●	●	
Coping with Multiple Sclerosis Scale (CMSS)	Validated measure of coping with multiple sclerosis-related problems to promote psychological wellbeing			●	●	●	●	
iAx	Assessment and personalised feedback software to assist health practitioners with the treatment of alcohol and cannabis addiction			●	●			
Dietary therapy for drug-resistant epilepsy	Wellness/health food supplement to help manage seizures for drug-resistant epilepsy patients			●	●
